- **Technical Skills:** Figma, UI/UX Design, Wireframing, Prototyping, User Flows , Design Systems (Atomic Design, Tokenization), Usability Testing, User-Centered Design, Agile Planning, Design Documentation, AI-assisted Product Development (Claude, Gemini, Figma AI, Lovable)
- **Certifications:** Google: Foundation of UX Design (2022)

RELEVANT EXPERIENCE

Alturian

Jakarta, Indonesia

Product Manager

Dec 2025 - Present

- Own product development for ERP SaaS platform (Merchandising, PoS, Bookkeeping) targeting SMEs
- Lead product discovery, competitor analysis, and feature prioritization for MVP development
- Translate business needs into product requirements, user flows, and system-level specifications
- Work closely with engineering to manage execution, including sprint planning, ticketing, and quality assurance.
- Balance speed and scalability by making trade-offs across business, UX, and technical constraints
- Introduced AI-assisted workflows to reduce turnaround time from idea to implementation

Senior Product Designer

Jun 2025 - Dec 2025

- Managed end-to-end design across multiple multiple business units with shifting priorities
- Switch seamlessly between UI/UX, branding, graphic design, and website content updates
- Improved requirement clarity and reduced iteration cycles through better early-stage alignment
- Acted as key bridge between design and engineering during development cycles

Product Team Lead

Jul 2023 - Jun 2025

- Led a team of 2–4 designers across ERP, HRIS, and loyalty platforms
- Established structured workflows to improve delivery consistency and cross-team collaboration
- Developed and maintained scalable design systems across multiple products
- Contributed to product direction through user insights and system-level thinking

Product Designer

Oct 2022 - Jul 2023

- Designed UX for retail platforms including PoS and scan-and-go experiences
- Delivered end-to-end flows from user journey to high-fidelity UI
- Improved usability and reduced friction in transaction-related user flows
- Recognized as high-potential contributor and promoted to managerial track

Indosat Ooredoo

Jakarta, Indonesia

Big Data Analyst Intern

Jun 2020-Aug 2020

- Supported product and business decisions through data analysis and insights
- Translated complex datasets into actionable and user-centric recommendations
- Developed skills in product analysis, data interpretation, and data-driven storytelling.

Faculty of Computer Science, Universitas Brawijaya

Malang, Indonesia

Assistant Lecturer of Information System Analysis & Design

Jan 2020-Jun 2020

- Assisted in teaching UX and system design concepts
- Improved student outcomes through structured guidance and evaluation
