- **Product & Technical:** Product Discovery, Requirement Gathering, System Design, Business Analysis, Agile/Scrum, Stakeholder Management, MVP Development
- **Agentic AI Tools:** Hermes Agent, Claude Code, Codex, Opencode
- **Certifications:** Google: Foundations of UX Design (2022)

RELEVANT EXPERIENCE

Alturian

Jakarta, Indonesia

Product Manager

Dec 2025 - Present

PRODUCT INITIATIVE

- Drive R&D for new product initiatives, taking ideas from discovery to MVP; initiatives shipped to date include a merchandising ERP and a property rental management system
- Lead product discovery, competitor analysis, and feature prioritization to define and ship MVP scope.
- Translate business needs into product requirements, user flows, and system-level specifications.
- Orchestrate the R&D project with an agentic AI setup with Hermes agent to accelerate working pipeline.

CLIENT PROJECT

- Act as business analyst & product owner for an FMCG retail client's quick-commerce product.
- Map the client's business processes into product requirements, backlog, and delivery scope.
- Bridge client stakeholders and engineering through requirement alignment, sprint planning, ticketing, and QA.

Senior Product Designer

Jun 2025 - Dec 2025

- Managed end-to-end design across multiple business units with shifting priorities.
- Switched seamlessly between UI/UX, branding, graphic design, and website content updates.
- Improved requirement clarity and reduced iteration cycles through better early-stage alignment.
- Acted as a key bridge between design and engineering during development cycles.

Product Team Lead

Jul 2023 - Jun 2025

- Led a team of 2–4 designers across ERP, HRIS, and loyalty app projects.
- Established structured workflows to improve delivery consistency and cross-team collaboration.
- Developed and maintained scalable design systems across multiple products.
- Contributed to product direction through user insights and system-level thinking

Product Designer

Oct 2022 - Jul 2023

- Designed UX for retail platforms including PoS and scan-and-go experiences.
- Delivered end-to-end flows from user journey to high-fidelity UI.
- Improved usability and reduced friction in transaction-related user flows.
- Recognized as a high-potential contributor and promoted to the managerial track.

Indosat Ooredoo

Jakarta, Indonesia

Big Data Analyst Intern

Jun 2020-Aug 2020

- Supported product and business decisions through data analysis and insights.
- Translated complex datasets into actionable, user-centric recommendations.
- Developed skills in product analysis, data interpretation, and data-driven storytelling.

Faculty of Computer Science, Universitas Brawijaya

Malang, Indonesia

Lecturer Assistant of Information System Analysis & Design

Jan 2020-Jun 2020

- Assisted in teaching end to end product management cycle.
- Improved student outcomes through structured guidance and evaluation.
